

Gallery - Bedroom Furniture

The Bedroom portfolio includes some of my largest and most intricate pieces: head boards, armoires, entertainment units and dressers. Bedroom Suite One

Here is a bedroom suite I made for one of my daughters and her husband.

The Headboard / Armoires features curio lighting, vertical storage shelving and drawers, pullout laminate-lined bed side trays and a "secret" compartment in the headboard.

Shown here is the matching Computer/Entertainment unit for the bedroom ensemble shown above. It features two file drawers in the lower right hand unit, laminate-lined pullout keyboard tray (matches those on the headboard ensemble), curio lighting in both the upper units, small movable unit for the computer tower to allow easy back side access for wiring and a built-in TV unit between the left and right upper armoire units.

(Click image or menu for close-up) Bedroom Suite Two

Here is another bedroom suite which includes a Headboard with attached Armoires and small entertainment unit.

These red oak Headboard/Armoires feature tambour style (roll-top) headboard compartments, built-in reading lights, and a mirrored center section. There's lots of storage (both shelving and drawers) in the side armoires. The stain is a medium walnut with a semi-gloss lacquer finish.

The matching TV armoire houses a pull out TV tray in the upper compartment with two large drawers below.
