

Gallery - General Furniture

These are some of my furniture creations which range include:

- individual high quality pieces for a unique or specific purposes
- entire room sets
- custom pieces built to match an existing color and style
- built-ins such as cabinets, desks or shelves

Shown here is a side board I built for my wife to use when entertaining. When not in use it folds into a buffet style piece. When in use, the laminated surface of the top is exposed and expands the useful serving area about 50%. Construction is of solid maple with a high gloss lacquer finish.

Living Room Set

Here for use in my own home is a coffee table, end table, and sofa table ensemble. Features include solid oak construction (exception being the drawers), inlaid walnut strips in the "oak tops, and convenient storage areas in either the drawers or compartments behind the inset raised panel doors. The finish is semi-gloss lacquer.

Shown here is a small sofa table with matching mirror frame. Red painted areas are oversprayed with clear semi-gloss lacquer. Construction is from solid ash.
